- C++
- JAVA

Maheswaram
Jeji Chandra Sekhar

CARRIER OBJECTIVE

To obtain a challenging position as a React.js Developer where I can leverage my expertise in the MERN stack (MongoDB, Express.js, React.js, Node.js) to build scalable and efficient web applications. Eager to contribute to a collaborative development team while continuously enhancing my technical skills and supporting organizational goals through strong attention to detail and problem-solving abilities.

PROJECTS

SALVAGING AND GARBAGE CATALOGUING CENTERED ASSISTANT
Python, ML models

By using YOLO algorithm we have done trash classification by giving an image of trash as an input it classifies the objects in the image as 6 categories –(Plastic , Paper , Cardboard, Metal , Paper , Trash). And tells that object as it is recyclable or not by using supervised learning algorithms. We did this by YOLO variants (V5,V7).

INDIVIDUAL PERSONS CONTACTS STORAGE
Full-Stack Web Application | React.js, Node.js, Express.js, MongoDB, Bootstrap

Built a contact management web app using the MERN stack (MongoDB, Express.js, React.js, Node.js). Users can add, view, edit, and delete personal contacts. Created a responsive design with React and Bootstrap, and used REST APIs for smooth data handling between frontend and backend.

INTERNSHIP

MERN Stack Developer Intern
Suthra Technologies – [Vijayawada]   *Nov 2024 - Present*

Working as a MERN Stack Developer Intern at Suthra Technologies, where I am developing full-stack web applications using MongoDB, Express.js, React.js, and Node.js. Responsibilities include building responsive user interfaces, creating and integrating RESTful APIs, collaborating with the development team on live projects, using Git for version control, and learning deployment processes.

CERTIFICATIONS

- HTML & CSS & JS   -Infosys SpringBoard
- React JS   -HackerRank
- Node JS   -Scalar
- JAVA   -nptel
